- 2) Avoid areas of irreversible losses.
- 3) Capitalize on the odds of achieving sustainable gains and maximize the behavior of investors to obtain their full potential.

The principles in this book, laid out years ago, are even more true today. Take control of your financial future and reap the rewards of Benjamin Graham's wisdom. Whether you are a seasoned professional or just starting out in your investment career, we can all learn from the concepts of *The Intelligent Investor*.

"I read the first edition of this book early in 1950, when I was nineteen. I thought then that it was by far the best book about investing ever written. I still think it is. " - Warren E. Buffett

TRAINERS WANTED

Workforce Development

Our Workforce Training business and professional classes throughout the Panhandle are taught by experts from our own communities.

If you have skills and experience in a vocational field, we want to hear from you. Our trainers are business owners, retirees, and full or part-time professionals.

Class times and schedules are flexible depending on the topic. Knowledge, passion for your subject and a desire to share it with others is all you need. We can even help you create your training content and materials.

Examples are software basics, customer service, budgets and financial reports, accounting basics, and business planning to name a few. And we're open to new ideas.

Professional certification is not required to instruct. Subject matter knowledge and the motivation to share are all that's required. Classes can be delivered at any of our three campuses or via webinar.
